

**RFP 22-007
STUDENT TUTORING SERVICES**

ADDENDUM #2

Submitted Questions

- 1) Will vendors be able to leverage classroom or school district space to provide the requested tutoring services? **That would be determined by the schools.**

- 2) Will the vendor be responsible to verify for each student their income eligibility [from the Scope of Services, #7 under “The City’s expectations...”]? Our experience is that the school districts do not like agencies asking for this information and will not provide this information to partnering agency due to privacy issues. **The schools will be responsible for ensuring that only students who meet the qualifications are referred by the schools to the program. Vendors will be responsible for communicating the qualifications as needed.**

- 3) Can you provide more information on the involvement of Cobb County Public Schools? Specifically, will district representatives be available to coordinate student enrollment and provide the necessary information for rostering? **The local schools and the City enjoy a strong relationship and also share the City’s goals for this program. Proposers may include a description of information needed and desired from the schools.**

- 4) Is this service being provided by the city to the school district or by the city to students and families? **The students will be the recipients of the services rendered in this contract.**

Thank you for your interest in partnering with the City of Powder Springs. We look forward to reviewing your response.
